Summary

Software engineer with experience in Python, SQL, machine learning, and web development. Built scalable web scrapers and cloud-based data pipelines. Skilled in AI model evaluation, data processing, and full-stack development, seeking opportunities in software engineering with a focus on data and AI applications.

Experience

Software Engineer Contractor

Truthkeep.ai

Jun 2025 – Present

- Designed and implemented a scalable Python web scraper from scratch for a technical electronics forum, processing ~180,000 threads across thousands of pages.
- Developed separate backfill and daily sync ETL pipelines with caching and binary search logic, reducing page requests by ~50% and updating only new or modified threads efficiently.
- Optimized concurrent scraping with multithreaded workers, handling threads ranging from 1–500 pages without triggering rate limits.
- Implemented bot evasion via `curl_cffi` fingerprint impersonation and API integration for seamless scraping.
- Packaged scraper in Docker and deployed to AWS Lambda, storing structured JSON data in S3 for downstream AI analysis and integration.
- Defined hierarchical data schema for forums, threads, and posts to ensure clean, analyzable datasets for AI and analytics applications.

AI Evaluation Specialist

xAI

Aug 2024 – Present

- Evaluated thousands of large language model (LLM) outputs, applying quantitative scoring criteria to support model training and verifier model development.
- Designed and refined evaluation metrics for reasoning, coding, and math tasks, contributing to AI quality assurance pipelines and structured model assessment.
- Automated internal data workflows using AI-assisted summarization and spreadsheet macros, reducing manual review time by an estimated 30–40%.
- Mastered prompt engineering and AI model behavior analysis, enabling systematic evaluation of LLM responses.

Skills

- **Programming:** Python (Pandas, BeautifulSoup), TypeScript, React, SQL
- **Tools & Cloud:** Git, Docker, AWS Lambda and S3
- **AI & ML:** PyTorch, TensorFlow, neural networks, deep learning, LLM evaluation, prompt engineering

Education

MS, Applied Statistics and Data Science

University of California, Los Angeles

2022 – 2024

Thesis: [2021 San Francisco Giants Performance Analysis]

BS, Statistics and Data Science

University of California, Santa Barbara

2018 – 2022
